

BE BEAR AWARE!

You are camping in bear country but should not have problems if you follow the rules of safe camping and be bear aware at all times!

- Never keep food in or cook near your tent
- Store food and toiletries in bear proof containers or in an airtight container inside of your vehicle
- Clean up, store food, and remove garbage immediately after meals
- Do not leave food on the picnic tables
- Use the bear proof garbage cans provided or store your garbage in a secure location with your food
- Don't bury or burn excess food; bears will still be attracted to the residual smell
- Never approach a bear or pick up a bear cub

We care about our bears...keep them safe by not attracting them to the campgrounds

All RV sites are full hook-ups with electric, water and sewer connections.
