Basis and Purpose:

Boundary Modifications for GMUs 3 and 301

Previously Moffat County Road 158 was listed as part of the GMU boundary description for both GMUs 3 and 301. This road used to be open for public travel and connected county roads 3 and 5 in the past. However, Moffat County Road 158 is no longer designated as a county road or open for public travel making it is more difficult for hunters on the landscape to identify the boundary between GMUs 3 and 301. For this reason, Moffat County Road 158 has been removed entirely from both GMU boundary descriptions.

Boundary Modifications for GMUs 56, 57, 58, 69, 86, 581, 691

Hwy 50 has long been used as a boundary for these GMUs, but biologically the Arkansas River is a more accurate boundary. Therefore, these GMU boundary descriptions have all been modified to use the Arkansas River instead of Hwy 50. The Arkansas River will continue to be an easily identified boundary. This is also consistent with how GMU boundaries are currently aligned in the upper Arkansas river valley, upriver from Salida.

Boundary Modifications for GMUs S12 and S78

The recently revised and approved RBS-05 Herd Management Plan recommended that the GMU boundaries for S12 and S78 be modified, so that S78 includes that portions of the DAU to the west of Hwy 91. S12 has also been expanded to the north to encompass all of the Ten-Mile Range. Due to overlap with the Sugarloaf domestic sheep allotment, bighorn within the new S78 boundaries will be removed from this unit as long as the domestic sheep allotment is still active. With this action, CPW is proactively managing to prevent interactions with domestic sheep much as feasibly possible.
