### OTC Archery for residents is a "social issue" inside of a "wildlife management issue"

Our herds are healthy

For 6a. both Alternatives 1 & 2 were highly discussed by the CPW staff and CPW has proposed Alternative 1 and Alternative 2. CPW staff would not put an alternative on the table if it was not a sustainable way to manage our wildlife.

Both Alternatives would be good for our wildlife so why not try the alternative that will help protect hunting heritage the most for residents. We believe that would be Alternative 2

#### We have been asking for some kind of limitation on non-resident OTC elk licenses for years

- Three years ago changes were promised by CPW if the state senate bill to limit non-resident OTC licenses was pulled, please make the right changes now so that another bill is not ran that takes away the management power of the CPW
- We are not asking for a large cut in non-resident tag allocation in the historical OTC units but we do want to see some kind of limitation so that 60+ precent of the OTC archery hunters are not nonresidents and so that the numbers do not continue to grow.
- Residents have been asking for a **small limitation for years**... now a massive one has been proposed...

### Population Management

- According to a study published in the Journal of Wildlife Management, states with overthe-counter hunting licenses for residents have been more effective in managing elk populations compared to states with more restrictive licensing systems.
- We do have management built into OTC hunts by protecting bulls with the point restriction.
- In most instances OTC archery elk hunters contribution to **cow harvest is not** significant enough to have a measurable effect on herds.

### Colorado has less than half the elk population as seven other western states combined but sells more licenses to non-residents than those other states combined

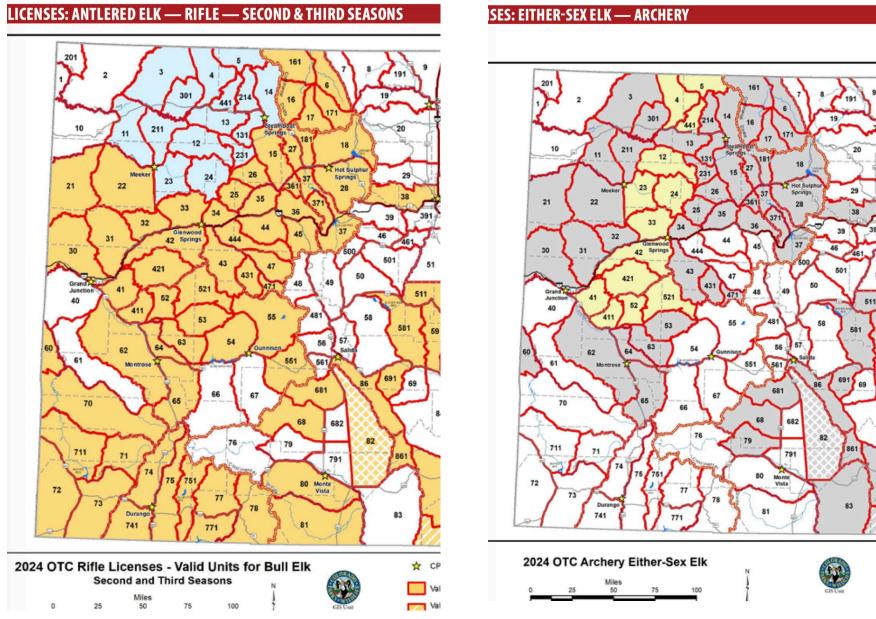

R

Top 7 Western States VS CO in Nonresident Elk Tag Sales Nonresident (NR) Elk Tag Sales -----Top 7 Elk States VS Colorado **Total Elk Tags** Sold To 2021-2022 % to Nonresidents Total Elk Elk Nonresidents \*\* **Tags Sold** Population State 17,000 15% 113,000 170,000 Montana 12% 12,800 104,000 130,000 Oregon 9% 5,400 120,000 57,500 Wyoming 12,800 14% 88,500 Idaho 107.000 New 34% 12,750 37,000 90,000 Mexico 7% 48,750 3.250 Utah 85,000 2900 10% 40.000 29,000 Arizona 477,750 66,900 Total 201,000 72,000 Colorado \*\* Does not included private land tags sold back to nonresidents Notes: The 7 Western States have more than 2.5 X's the elk population (742k

We already give way more elk hunting licenses than any other state. We are the land of opportunity for nonresidents but we can still be that and keep hunting accessible for resident hunters

Notes: The 7 Western States have more than 2.5 X's the elk population (742k vs 280k) yet combined the 7 Western States sell 5,100 less elk tags to NR's, than Colorado. The 7 state average % of elk tags sold to NRs is 14%, Colorado sells 36% of its tags to NR's, nearly 3x more than average.

## 26 more OTC Rifle units than archery west of I25

#### Alternative 1will have a much larger financial impact on Colorado's resident hunters

- For 2024 a resident OTC elk license will cost \$66.12 plus \$10 habitat stamp
- If residents are forced to apply for the draw they will be forced to buy a "qualifying license that will add up to \$60 to the cost of the license and a minimum of \$36. that is a huge financial increase to someone that is hunting to help put food on the table.

# Why will this time be different from the past?

When OTC archery units were reduced in the past it did not result in less OTC archery hunting licenses sales like what was anticipated by the CPW staff, It pushed more hunters into less units.

History will repeat itself and the OTC rifle units will get flooded if archery is limited and rifle is not.

### What are the safety concerns to go with this?

When the number of OTC rifle hunters increase how will that effect the safety of other hunters in the field?

Hard cap that applies to all rounds of first draw and something that applies to the second draw
