

## 2007/08 Small Game Harvest Report

The general small game harvest survey was conducted by phone. A sample of approximately 14% of the hunters in the HIP (Harvest Information Program) database (8,501 out of 59,856) was drawn. The surveyor attempted to contact 70% of the sample within the time allowed. 4,069 hunters were surveyed (48% response rate).

For the 2007/08 survey, for species including chukar, jack rabbits, snow shoe hare, fox and pine squirrel, marmot, coyote, red fox, raccoon, badger, beaver, muskrat, Wyoming ground squirrel, rattlesnake, snapping turtle, and tiger salamander, harvest estimates were not collected, only hunter numbers were estimated.

The report provides estimated statewide harvest, days in the field, and hunter number for **10** small game species; pheasants, scaled, Gambel's and bobwhite quail, cottontail rabbits, blue grouse, Abert's squirrel, coyotes, mourning dove and ptarmigan. In addition, there are estimates for each of these 10 species by county. The 2007/08 survey collected data specific to small game hunting on Walk-In Access lands. Specific questions for WIA were posed to hunters that indicated they hunted pheasants, scaled quail, mourning dove and cottontail rabbits.

**County harvest estimates may be based on a relatively small number of hunter responses and may be accompanied by large confidence intervals.** Harvest estimates (county and statewide) are generated based on the responses of those hunters contacted for the survey. These responses then form the basis of an estimate of species harvest for the small game hunting public at-large.

Those portions of the report that have frequency designations or are pure percentages are based on the actual number of hunters surveyed and their responses to survey questions. ***The harvest figures are estimates of total harvest extrapolated from survey responses.*** The estimates are followed by the standard error (SE) of the estimate which is a measure of the precision of the estimate. The 95% UCI and 95% LCI columns provide the upper and lower values for the 95% confidence interval around the estimate.

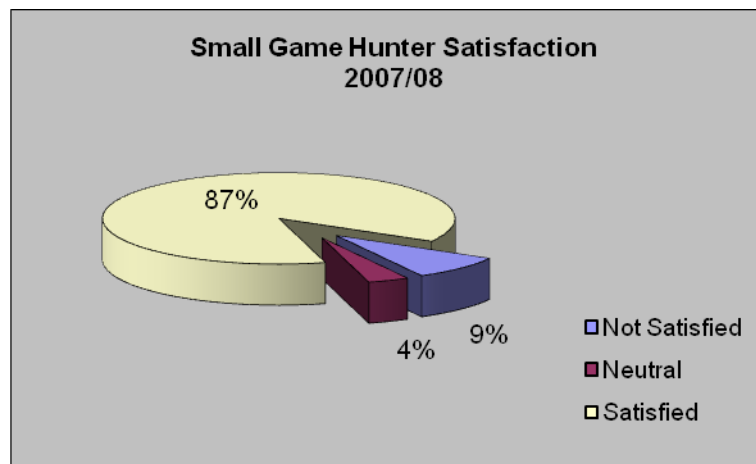

So, for example, we estimated statewide harvest of blue grouse at 15,745 with a SE of 1,487. The 95% confidence interval range suggests that between 12,853 to 18,702 blue grouse were harvested during the 2007 small game season.

## Hunter Numbers

Species	Hunters	SE(hunters)	LCI Hunters	UCI Hunters
<b>Chukar</b>	650	94	483	855
<b>Jack Rabbit</b>	2037	166	1734	2385
<b>Snowshoe Hare</b>	586	90	432	787
