

Scott Park, Noble Energy

Scott serves as Manager of Water Resources for Noble Energy in Colorado. Scott previously managed the Noble EHSR Department covering Colorado, Nevada, and Montana. Prior to his five years at Noble, Scott was an environmental and regulatory compliance consultant with domestic and international experience supporting oil and natural gas, mining, manufacturing, and power industries and government agencies. Scott's background includes work in air quality, natural resources, remediation, regulatory permitting and compliance, emergency response, wildlife, water resources, agency engagement, community relations, and occupational and process safety.
