

## Wade Shelton, Trust for Public Land

Wade Shelton has nearly 20 years of experience working in land conservation and environmental restoration. As a Project Manager in the Trust for Public Land's Denver Office since 2007, Mr. Shelton manages and completes a diverse range of land conservation projects across Colorado in a variety of landscapes, whether it's building a successful conservation in Colorado's Upper Arkansas Valley, or completing complex park and open space projects with the City of Denver, the City of Loveland, Adams County, or the U.S. National Park Service. Mr. Shelton has also worked for the Brandywine Conservancy in Pennsylvania, built a professional land conservation program for the Eno River Association in North Carolina and managed waterway restoration projects for Baltimore County, Maryland.

Mr. Shelton holds a B.A. in Environmental Biology from Colgate University, a Master's in Environmental Management from Duke University, has studied wildlife management in Kenya, has been published in the Carolina Planning Journal, and has received awards from the National Association of Counties, LiveWell Westwood, the Land Trust of the Upper Arkansas, and the Lake County Open Space Initiative.
