H. PECE Standards	28
III. CONSERVATION ASSESSMENT	30
A. Biology and Life History	30
<u>Species Description</u>	30
<u>Food Habits</u>	30

<u>Life History and Movements</u>	32
<u>Breeding</u>	32
<u>Nesting</u>	33
<u>Survival</u>	34
<u>Movements</u>	34
<u>Habitat Requirements</u>	35
<u>Breeding Habitat: Leks (March – mid-May)</u>	36
<u>Breeding Habitat: Pre-laying (late March – April)</u>	37
<u>Breeding Habitat: Nesting (mid-April – June)</u>	37
<u>Breeding Habitat: Early Brood-rearing (mid-May – July)</u>	38
<u>Summer – Fall Habitat (July – September)</u>	38
<u>Winter Habitat (October – February)</u>	39
B. Distribution and Abundance	40
<u>Distribution</u>	40
<u>Historic Distribution</u>	40
<u>Areas Added to Historic Map</u>	42
<u>Areas Deleted from Historic Map</u>	43
<u>Uncertain Sage-grouse Species: Added</u>	44
<u>Current Distribution</u>	46
<u>Abundance</u>	50
<u>Lek Counts and Population Estimation</u>	50
<u>Assumptions Made in Sage-grouse Population Estimation from Lek Counts</u>	52
(1) <u>Percent of Leks Counted</u>	52
(2) <u>Interlek Movements</u>	53
(3) <u>Lek Attendance</u>	53
(4) <u>Sex Ratio</u>	54
<u>Alternative Methods of Population Estimation</u>	55
<u>Conclusions</u>	55
<u>Estimated Number of Males in Colorado GrSG Populations</u>	56
<u>Decline of Greater Sage-grouse</u>	57
C. Genetics	60
<u>Summary</u>	63
D. GrSG Habitat Mapping Efforts	66
<u>CCP Habitat Mapping</u>	66
<u>BLM Habitat Mapping</u>	66
E. Individual Populations: Status and Distribution	68
<u>Meeker – White River Population</u>	68
<u>General Description</u>	68
<u>Population Information</u>	68
<u>Historic Information</u>	68
<u>Local Conservation Plan</u>	68
<u>Completed Conservation and Habitat Actions</u>	68
<u>Easements</u>	69

<u>General Description</u>	71
<u>Population Information</u>	73

<u>Historic Information</u>	74
<u>Local Conservation Plan</u>	74
<u>Completed Conservation Habitat Actions</u>	74
<u>Easements</u>	76
North Park Population	77
<u>General Description</u>	77
<u>Population Information</u>	79
<u>Historic Information</u>	79
<u>Local Conservation Plan</u>	80
<u>Completed Conservation and Habitat Actions</u>	80
<u>Easements</u>	82
Northern Eagle – Southern Routt Counties Population	83
<u>General Description</u>	83
<u>Population Information</u>	84
<u>Historic Information</u>	85
<u>Local Conservation Plan</u>	85
<u>Completed Conservation and Habitat Actions</u>	86
<u>Easements</u>	86
Northwest Colorado Population	87
<u>General Description</u>	87
<u>Population Information</u>	89
<u>Historic Information</u>	90
<u>Local Conservation Plan</u>	90
<u>Completed Conservation and Habitat Actions</u>	91
<u>Easements</u>	92
Parachute – Piceance - Roan Population	93
<u>General Description</u>	93
<u>Population Information</u>	96
<u>Historic Information</u>	97
<u>Local Conservation Plan</u>	97
<u>Completed Conservation and Habitat Actions</u>	98
<u>Easements</u>	98
IV. ISSUES POTENTIALLY AFFECTING GrSG	99
<u>Agricultural Conversion</u>	99
<u>Disease and Parasites</u>	103
<u>Bacterial Diseases</u>	103
<u>Avian Cholera</u>	103
<u>Avian Tuberculosis</u>	103
<u>Salmonellosis</u>	103
<u>Chlamydiosis</u>	104
<u>Mycoplasmosis</u>	104
<u>Tularemia</u>	104
<u>Fungal Diseases</u>	104
<u>Aspergillosis</u>	104
<u>Viral Diseases</u>	105
<u>West Nile Virus</u>	105

<i>Avian Pox</i>	106
<i>Newcastle Disease</i>	106
<i>Avian Influenza</i>	106
<u><i>Parasitic Diseases</i></u>	107
<i>Hemosporidiosis (Avian Malaria)</i>	107
<i>Intestinal Coccidiosis</i>	107
<i>Tracheal Worms</i>	107
<i>Gizzard Worms</i>	107
<i>Cestodes</i>	108
<u><i>Ectoparasites</i></u>	108
<u><i>Conclusions</i></u>	108
<u>Energy and Mineral Development</u>	109
<u><i>Introduction</i></u>	109
<u><i>Evidence of Energy and Mineral Development Impacts to GrSG & GrSG Habitat</i></u> .	117
(1) <i>Direct Disturbance, Displacement, or Mortality of Grouse</i>	117
(2) <i>Direct Habitat Loss</i>	119
(3) <i>Increase in Predation Pressure</i>	120
(4) <i>Increase in Invasive Plant Species and Habitat Quality Decline</i>	120
(5) <i>Cumulative Landscape-level Impacts on GrSG</i>	121
<u><i>Oil, Natural Gas, and Coal Bed Methane Development</i></u>	122
<u><i>Oil Shale</i></u>	125
<u><i>Mining</i></u>	125

APPENDICES

Working Appendices

Appendix A: GrSG Structural Habitat Guidelines.....	A-1
Appendix B: GrSG Disturbance Guidelines.....	B-1
Appendix C: Habitat Monitoring Protocol.....	C-1
Appendix D: Recommendations: Plant Species for GrSG Habitat Management/Restoration. ..	D-1
Appendix E: Grazing Management Options for GrSG.....	E-1
Appendix F: Available Funding Opportunities for GrSG Habitat Conservation.	F-1

Energy and Mining Appendices

Appendix G: Energy and Mining Leasing and Development Process.....	G-1
Appendix H: Literature Review: Oil and Gas Development Impacts on Prairie Grouse	H-1
Appendix I: Suggested Management Practices Applicable for Oil and Gas Development, within Lease Rights.....	I-1

Other Appendices

Appendix J: GrSG GIS Data: Habitat Type, Landownership, Easements.....	J-1
Appendix K: Population Viability Analysis Report.....	K-1
Appendix L: Threats Ranking for GrSG.....	L-1
Appendix M: Scientific Names of Organisms Mentioned in the CCP.....	M-1
Appendix N: Definitions of Acronyms Used in the CCP and Description of “Responsible Parties” Listed in the Conservation Strategies.....	N-1

ACKNOWLEDGEMENTS

Many people, agencies, and organizations have contributed to the development of this conservation plan. Special thanks go to the local work group members who served as advisory members to the steering committee: Carl Herold, John Kossler, Mike Lopez, John Rich, and Jean Stetson. Their advice, diligence, good humor, and endurance were invaluable in the process.

Michelle Cowardin and Karin Eichhoff contributed significantly to the plan, with their meticulous work on maps and GIS analyses. John Toolen's and Mike Grode's assistance with funding and project support during plan development was much appreciated. Dr. Ann Hild, Dr. Sara Oyler-McCance, and Dr. Mike Phillips, provided their considerable expertise to the assessment, issues, and/or analysis sections. Dr. Tom Remington, Tom Thompson, and Al Pfister, also made contributions to portions of the issues and/or analysis sections. Dr. Phil Miller and the Conservation Breeding Specialist Group worked diligently to lead development and refinement of the PVA. Dr. Brett Walker reviewed carefully and commented thoughtfully on the plan. Finally, thanks to the many stakeholders, both from the public and from various agencies, who reviewed and commented on the plan.
