## News and Information

### **CPW's Aquatic Nuisance Species Roadside Inspection Program Goes Full-Time**

Colorado Parks and Wildlife began operating two aquatic nuisance species (ANS) watercraft inspection and decontamination stations at the Colorado State Patrol Loma and Trinidad Ports Of Entry on Thursday, March 14.

Through October 31, any vehicle with a motorized or trailered watercraft entering the state on I-70 east from Utah ([Loma Port Of Entry](#)) or I-25 north from New Mexico ([Trinidad Port Of Entry](#)) will be required to stop for an inspection between Thursdays and Mondays.

Watercraft that are clean, drained and dry will be provided a green seal and white receipt showing they passed inspection. Watercraft that are found to have mud, water, plants or mussels will be decontaminated. All trailered and motorized watercraft will still be required to go through an ANS inspection at their final destination. Those with a green seal and white receipt from Port of Entry check stations will be expedited.

## [Learn to ice fish at Staunton State Park](#)

**Sunday, March 24, 10a-2p**

All equipment will be provided if you don't have your own. Clinic will be held at Davis Ponds, no registration necessary, just drop by and give ice fishing a try anytime between 10 a.m. and 2 p.m. Park pass fees apply and fishing licenses are required for anyone 16 or older.

## [Learn to ice fish at Staunton State Park](#)

**Thursday, March 28, 10a-2p**

All equipment will be provided if you don't have your own. Clinic will be held at Davis Ponds, no registration necessary, just drop by and give ice fishing a try anytime between 10 a.m. and 2 p.m. Park pass fees apply and fishing licenses are required for anyone 16 or older.

## [Ladies Night | Fly Fishing 101 at Barr Lake State Park](#)

**Wednesday, April 3, 6-8:30p**

Hello, ladies! Have you wanted to learn to fly fish? In this ladies-only workshop, you will learn about fly fishing equipment, basic casting, knots, and fly selection. No fishing license required as we will not be on the water. Workshop is free, but standard park pass fees will apply. Click the link to register!

## [Fly Fishing 101](#)

**Saturday, April 6, 9a-1p**

Ever wanted to give fly fishing a try but didn't know where to start? Are you new to fly fishing and looking for some tips to help you catch more fish? Then this is the class for you! Learn all the basics from rod/reel setups, basic knots, casting, presentations, and types of flies at Lake Lehow from 9 a.m. to 1 p.m. Click the link to register!

## [Fly Fishing 101](#)

**Sunday, April 7, 9a-1p**

Ever wanted to give fly fishing a try but didn't know where to start? Are you new to fly fishing and looking for some tips to help you catch more fish? Then this is the class for you! Learn all the basics from rod/reel setups, basic knots, casting, presentations, and types of flies at Lake Lehow from 9 a.m. to 1 p.m. Click the link to register!

## [Ladies Night Out Fly Fishing 101 at Barr Lake State Park](#)

**Wednesday, April 17, 6-8:30p**

Hello, ladies! Have you wanted to learn to fly fish? In this ladies-only workshop, you will learn about fly fishing equipment, basic casting, knots, and fly selection. ## Catch of the Week

The Catch of the Week goes to 8-year-old Maya Carley!

Her father Jeff says she “brought in this 21.5-inch cutbow all by herself from hook-set to shore! It’s bigger than any trout I’ve ever caught!”

Well done, Maya! Save some for the rest of us!

*Have a fish you’re proud of? Share a photo!*  
Send an email to [dnr\\_fish.reporter@state.co.us](mailto:dnr_fish.reporter@state.co.us) with subject line: *Catch of the Week*

## Tip of the Week | Spring Tune-Up

Spring fishing is upon us — are you prepared?

While luck may play a role in angling success, preparedness is key. Your tackle and equipment can make or break your fishing expedition. Now is the perfect time to organize and fine-tune your gear. There's nothing more disheartening than arriving at your favorite fishing spot only to discover issues with your equipment — a malfunctioning reel, damaged rods, or tangled lines can quickly turn a promising outing into a frustrating experience.

Paying attention to the condition of your gear not only enhances your chances of success but also ensures a more enjoyable fishing trip.

**Fishing Line:** It's advisable to replace your fishing line at least once a year, especially if it has been exposed to extreme temperatures, such as those found in a vehicle or storage compartments. Opt for high-quality monofilament lines with minimal memory, small diameter, and low visibility. For trout, 4 to 6-pound line is generally sufficient, while larger fish may require heavier lines. Line strength is determined by its break rating, and many sporting outlets offer line replacement services, which can be both cost-effective and environmentally friendly.

**Reels:** Fishing reels don't need to break the bank to be effective, but they do require regular cleaning and lubrication to maintain optimal performance. Excessive dirt or sand can lead to sticking or internal damage, necessitating cleaning. This process, outlined in most owner's manuals, involves removing the line spool and using a soft brush or rinsing to remove debris. A quality reel lubricant containing Teflon and water-displacing properties should be applied sparingly to moving parts. Many bait shops offer reel cleaning services for those who prefer not to tackle this task themselves.

**Rods:** Inspect your fishing rods for any signs of damage, particularly to the tip and line guides. Replacing a broken tip or guide is straightforward and inexpensive, with repair kits readily available. These kits typically include various rod tips for different diameters, along with ferrule cement for easy application. Ensuring proper alignment and securing the tip in place before the adhesive sets are essential steps. While replacing line guides requires more effort, it's a worthwhile investment in the longevity of your rod. Ensure compatibility between the new guides and your rod material to prevent damage, especially when using braided lines.

**Tackle:** Check your tackle box to ensure you have all the necessary gear for your upcoming trip. Moisture can infiltrate tackle boxes, leading to rust and corrosion on hooks and lures. Dull or rusty hooks should be either cleaned and sharpened or replaced altogether. Similarly, expired or improperly stored bait and scents can lose their effectiveness and should be discarded accordingly.

By investing time in preparing and maintaining your equipment, you'll not only increase your chances of success but also enhance your overall fishing experience.

## Comments or Questions?

Email us at [dnr\\_fish.reporter@state.co.us](mailto:dnr_fish.reporter@state.co.us). We would love to hear back from our subscribers regarding fishing reports, tips and requests of material you would like to start seeing more of. Any useful feedback helps us make our fishing reports a “go-to” resource for anglers fishing Colorado’s waters. Good luck out there!
