

APPENDIX C
WILDLIFE

Wildlife Species of Cheyenne Mountain State Park

Compiled by Colorado State Parks, 2001

Codes

***Imperiled species are those with Partners in Flight (PIF) Tot=>21 or Covers =>38; or Colorado Natural Heritage Program (CNHP)=<S3** (PT= Population Trend- Birds with high scores for PT are more demonstrably in need on conservation action than are birds with low scores; AI= Area Importance- =>3 indicates greater conservation value.)

****Federal or CO Status:** E= federally endangered; T= federally threatened; PT= Proposed Threatened; C= Candidate; DM= Delisted Taxon, Recovered, Monitored first five years; SE= State endangered; ST= State threatened; SC= State species of concern; FS= Sensitive (identified by the regional forester); BLM= Sensitive (found on public lands, similar to C).

****CNHP Status:** G= Global; S= State; B= Breeding Status; 1= critically imperiled because of extreme rarity; 5= demonstrably secure; N= Non-breeding status; SH= historically known but not verified for an extended period of time; SZ= migrant, occurrences too irregular, dispersed or transitory; T= trinomial rank used for subspecies

****Source codes:** AF= Peterson Air Force Base; CH= Cheyenne Mountain State Park; FC= Fort Carson Army Base; FL= Florrissant National Monument; DM= Distribution Maps for El Paso County; EP= El Paso County Species Lists; N= NORAD Air Force Facility

****Likelihood to be Present codes:** 1= Animal or animal sign observed onsite; 2= Suitable habitat present and animal is very likely; 3= Some suitable habitat present and animal could be present; 4=Limited suitable habitat- animal not likely, but if present may use area for food (potentially important food source); 5= Migrant- may fly over or pass through area, but does not stay.
