*Disclaimer: This checklist is composed of bird species that are most likely to be seen at this state park. The intent of this list is to help park visitors identify the breadth of species most commonly associated with this location. Other species that are rarely observed were purposely omitted from this list.*

## Birding Tips

Always view birds and other wildlife from a safe distance.

Use binoculars or a spotting scope for a closer view.

Protect young by avoiding nests or dens.

Help protect birds by using your senses to find them, not recorded calls.

To see more birds, keep voices and other sounds low.

Protect plants and wildlife by staying on trails and respecting closures.

Keep dogs leashed and under control at all times.

For the best viewing experience, leave pets at home.

Human food can hurt wildlife—please keep their diets wild.

Take nothing but pictures—leave what you find for others to enjoy.
