

# North Sterling State Park BINGO

**Rating: Difficult**

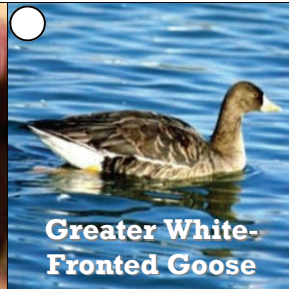

These animals, plants, and other park sights are infrequently seen during the entire year and may require a little luck, careful observation, and know-how to identify. This board is designed for visitors who frequently return to the park over several weeks or months.

To count for a square, you must **see, hear, find tracks or scat**, or other **evidence** of that species (i.e. a nest, burrow, feather, snake skin, etc.)

Remember, you can borrow free binoculars and field guides from the Visitor Center!
