

# North Sterling State Park

## BINGO

Rating: Moderate

These animals, plants, and other park sights are common, but require more careful observation and maybe some know-how to find and identify. This board is designed for older children and adults.

To count for a square, you must **see, hear, find tracks or scat**, or other **evidence** of that species (i.e. a nest, burrow, feather, snake skin, etc.)

Remember, you can borrow free binoculars and field guides from the Visitor Center!

Pronghorn Antelope

Nighthawk
