Status/Ranking explanations and the sources of information

All species have been named using the most recent nomenclature according to Weber and Wittmann, Third Edition, 2001

Exotic status is based on Weber and Wittmann, 2001 and Hartman 2001.

Sources: EC = Ecotone Corporation Weed and

Wetland Monitoring 2003

CNHP Status: G= Global; S= State; 1= Critically imperiled because of extreme rarity; 5= Demonstrably secure; B= Breeding status;

N= Non-breeding status; SH= Historically known but not verified for extended period of time;

SZ= Migrant, occurrences too irregular, dispersed or transitory; T=Trinomial rank used for ssp.;

SR= Reported to occur in state, but unverified; SA= Accidental in the state

Noxious Weed Status:- April 1, 2001 Rules - Colorado

Reveg Species: This species is known to have been used in revegetation work at this park

Wetland Indicator Status: May 1988 National List of Plant Species That Occur in Wetlands - U.S. Fish and Wildlife Service.

US Army COE uses the 1988 and not the 1996 version for doing delineations.

OBL Obligate Wetland Occurs almost always

FACW Facultative Wetland Usually occurs in

FAC Facultative Equally likely to occur in wetlands or

FACU Facultative Upland Usually occurs in non-

UPL Obligate Upland Occurs in wetlands in another

NA No agreement The regional panel was not able to

NI No indicator Insufficient information was available

NO No occurrence The species does not occur in that

* - An asterisk following a regional Indicator identifies tentative assignments based on limited information .

Likelihood to be Present codes: 1= Species verified by contractor; 2= Species was present on another floral list for this site;

3= species not verified, but possible based on habitat
