Figure 1. Northwest Colorado Greater Sage-grouse Population, Management Zone 2 (GMU 2) - Lek Count Trend 2006 to 2024.

Figure 3. Northwest Colorado Greater Sage-grouse Population, Management Zone 6 (GMU 10) - Lek Count Trend 1998 to 2024.

Figure 2. Northwest Colorado Greater Sage-grouse Population, Management Zone 4a (GMUs 4, 5) - Lek Count Trend 2004 to 2024.

For GMUs 2, 4, 5, 10, the current 3-Year average number of males counted on leks exceeds the 100-male threshold set in the NWCO GRSG Conservation Plan that allows for an active hunting season.
