April 24, 2020

To: Members of the Colorado Parks and Wildlife Commission

From: Dan Prenzlow, Director

Subject: Limited license recommendations for deer, elk, pronghorn, moose, and black bear

This letter is a summary and explanation of the enclosed Colorado Parks and Wildlife (CPW) annual limited big game license recommendations for the 2020 big game hunting season. The sum of these recommendations is 277,300 limited licenses, for 2,800 individual hunt code quotas, that represent the majority of the hunting opportunity for over 800,000 big game animals.

Additional details are included in both regulation form and in a series of table summaries titled 2020 Big Game License Recommendation Summary by Region and Species. The summary tables were sent to the Parks and Wildlife Commissioners and posted to the CPW Commission webpage. They can be found at the following link:

<https://cpw.state.co.us/Documents/Commission/2020/May/2020.OBJECTIVES.draft.041620.PWC.mailing.pdf>. Information in these tables, hereafter referred to as Summary Tables, transitions from a high-level summary to increasingly species-specific. Page 4 of the tables is particularly informative with Regional and Statewide totals for all five species. After that, each species has a table with license totals and changes for every population as well as figures and data demonstrating factors important to license setting.

The 2020 license recommendations are based on evaluation of harvest, age and sex classification data, population estimates, hunter distribution, Big Game Season Structure (BGSS) dates and timing, and social considerations for each big game herd in Colorado.

The Colorado Parks and Wildlife Commission publicly approves each Herd Management Plan (HMP), Bear Management Plan, and all limited license recommendations. The HMP for each herd incorporates the capability of the habitat to support big game populations, other social and biological limiting factors, and input from the public, organizations, and other agencies about their issues and concerns regarding hunting management and herd objectives. Annual harvest objectives and the resulting license recommendations for all hunts are designed to achieve the management objectives approved in the HMP. Female license increases are recommended in herds that are performing well and are at or above population objective ranges and female license reductions are recommended in herds that are below population

objective ranges. CPW staff use 3-year averages of hunter success rates for setting annual license recommendations to achieve harvest objectives.

The new 2020 BGSS resulted in a number of changes that factored into these recommendations. For example, the longer breaks between the regular rifle seasons pushed the seasons later into the month of November, which should increase harvest success on both elk and deer. Longer breaks are intended to allow animals to redistribute between seasons, potentially moving to areas more accessible to hunters. Later season dates increase the likelihood of snow and give more time for animals to migrate out of the high country making animals more accessible and visible to hunters. Finally, the mule deer rut starts in early to mid-November, the rut makes mule deer bucks more vulnerable because they are more active and associated with does. Consequently, new BGSS dates were factored into license recommendations. In herds that are at HMP objectives, licenses may have been shifted to earlier seasons to maintain similar harvest with the same license number. Conversely, when herds are above HMP objectives, licenses were often left in the same seasons which should result in higher harvest with the same licensing.

A Data Analysis Unit (DAU) is the geographic area and identifying number of a relatively discrete big game population or herd. DAUs can contain multiple Game Management Units (GMUs), which are geographic areas delineated to distribute hunters.

## **Deer**

Approximately 212,000 hunters applied for Colorado deer licenses in 2020. The majority of deer hunting in Colorado is managed by limited licenses; the only exceptions are over-the-counter white-tailed deer licenses available in the Southeast Region.

CPW staff are recommending similar total deer licenses as last year; all changes result in an increase of 980 deer licenses (+1%) to 101,500 limited licenses. A recommended decrease of 1,700 licenses in the Northwest Region was balanced out by an increase of 2,600 deer licenses in the Northeast and Southeast Regions combined.

Statewide, rifle buck licenses remained nearly the same at 55,400. Buck license recommendations were increased in herds that are above HMP sex ratio objectives. In DAUs where CWD prevalence is greater than 5%, management actions were taken to reduce prevalence, including buck license increases for several herds. Buck license recommendations were reduced in herds that were below sex ratio objective ranges. HMP sex ratio objectives, observed sex ratios, and CWD prevalence estimates for each herd are available in the Deer Table, which is Summary Table page 5.

The statewide total rifle doe license recommendation is 16,400, up from 16,100 (+300, +2%). Antlerless license increases are recommended in herds that are performing well and are at or above population objective ranges and to address game damage. Alternatively, these recommendations keep regular season doe licenses at the minimum of 10 licenses per hunt

code for all deer DAUs west of I-25 that are below population objective. In these below-objective herds, the majority of doe licenses are private-land-only licenses to address game damage. Private-land-only licenses and licenses with special restriction to address deer conflicts near towns make up approximately 70% of the doe licenses in below-objective herds.

After large deer population declines in 2007, the total deer population has averaged 420,000 over the last 10 years. The statewide post-hunt 2019 deer population estimate is 418,000, down from 433,000 last year. Population estimates are still far below the sum of statewide population objective ranges of 494,000-558,000 for all 54 deer herds combined. In 2019, 25 of 54 (47%) deer DAUs are below their population objective ranges. Population objectives that are appreciably higher than population estimates reflect CPW's desire to stabilize, sustain, and increase deer populations.

Diverse habitat types and environmental conditions around the state create considerable geographic variability in population performance. Many deer herds on the plains and central mountains are performing well. There is still reason for concern about declines, particularly in many of the large westernmost herds in Colorado.

CPW annually monitors well over 1,000 radio-collared mule deer in five Intensive Mule Deer Monitoring Areas to estimate survival. CPW also conducts post-hunt herd inventories, primarily with helicopters, to estimate the sex ratios of males/100 females and the age ratios of young/100 females. In addition to survival rates, these ratios are needed to estimate population size using population models. The Summary Tables include of number of animals classified and sex ratios by DAU, Region, and statewide.

The average of HMP sex ratio objectives for deer herds statewide is approximately 30 bucks/100 does. During the post-hunt herd inventories in 2019, CPW staff classified 69,000 deer and observed an average sex ratio of 32 bucks/100 does, which is down from 35 bucks/100 does in 2018. Reproduction and fawn survival to December was similar this year compared with the previous year, the statewide average observed age ratio from helicopter inventory was 58 fawns/100 does compared with 59 fawns/100 does in 2018.

Buck/doe ratios have shown a response to our management actions, and Colorado remains a premier destination for deer hunters.

## **Elk**

In 2020, approximately 215,000 hunters applied for Colorado limited elk licenses. All rifle antlerless, muzzleloader, first, fourth, and late season elk licenses are limited. Archery licenses and second and third rifle bull seasons in many GMUs are also limited.

CPW is recommending 129,500 limited elk licenses, up 3,000 licenses from last year. However, the limitation of archery hunting in elk DAUs E-16 (Frying Pan), E-24 (Disappointment), E-30 (Hermosa), and E-31 (San Juan) complicates the explanation of total

limited license recommendations. Converting what were previously unlimited over-the-counter (OTC) licenses to limited licenses recommendations results in an increase of 9,100 limited licenses for 2020. Without these new licenses; however, the total would be down 6,000 licenses.

Continuing with a 17-year trend, rifle elk license recommendations are reduced from last year by 5,200 (-5%) to 102,000. Antlerless licenses make up the majority of this reduction, down 5,100 (-8%) from last year. Muzzleloader license recommendations are reduced concomitantly by 500 (-4%). Rifle and muzzleloader elk license reductions are the result of a combination of herds achieving population objectives through antlerless harvest and low calf/cow ratios reducing population productivity.

The statewide elk population is stable. The 2019 estimate of 293,000 is up slightly from the 287,000 in 2018. The sum of Colorado's post-hunt population objective ranges for elk statewide is 234,000-284,000 for all 42 elk herds combined. The sum of statewide objective ranges is partially based on historic HMPs. Plans written before 2001 were written with outdated population models that underestimated elk numbers; as we update plans, we expect population objectives to change. Because season and license setting is designed to use antlerless harvest to bring elk populations to herd objectives, further reductions in antlerless licenses are anticipated in the future as more elk populations reach objectives or population objectives increase.

As we've intentionally reduced elk populations to achieve population objectives, hunters and outfitters increasingly have expressed concern that elk populations are becoming too low in some herds, despite the fact that 24 of 42 (57%) elk herds are above their current population objective ranges. Nonetheless, public perception of the desired number of elk in Colorado varies. CPW gives serious consideration to changing population objectives in herds as HMPs are updated and tries to balance public interests of landowners, local communities, public land management agencies, and hunters. Long-term experience with balancing these interests has informed CPW on the upper and lower social thresholds for elk population size in many herds, which benefits us greatly in herd management planning efforts.

The average of post-hunt sex ratio objectives in totally limited elk DAUs and expected sex ratios in over-the-counter DAUs for elk herds statewide is approximately 24 bulls/100 cows. In 2019, during the post-hunt herd inventories, CPW staff used helicopter surveys to classify 84,000 elk and observed a statewide average sex ratio of 22 bulls/100 cows, compared to 24 bulls/100 cows in 2018.

During these surveys over the past decade CPW has observed declining calf/cow ratios in the southern half of the state. In 2019, we observed the lowest statewide average calf/cow ratio ever at 37 calves/100 cows. The Southwest Region was the lowest at 30 calves/100 cows with the Northwest Region having the highest average at 45 calves/100 cows. Northern Colorado historically has had higher calf ratios by about 10 calves/100 cows. Elk research and

continued management changes are necessary since calf production remains low in many herds. Low calf ratios reduce the number of elk licenses CPW can issue.

The 2019 reductions in antlerless licenses are consistent with licensing trends of the last 17 years because many herds are near the desired population size and have low calf ratios. Having a combination of units that are limited in all seasons and units with both limited and over-the-counter hunting seasons allows us to offer a very wide range of hunting opportunities on the nation's largest elk population.

### **Pronghorn**

In 2020, approximately 87,000 hunters applied for Colorado limited pronghorn licenses. Pronghorn applications have increased substantially for the last several years. The majority of pronghorn licenses are limited, with the notable exception of over-the-counter archery licenses available in 70% of GMUs.

CPW is recommending 25,300 limited pronghorn licenses, down 700 (-3%) licenses from last year. The majority of this reduction is in the Southeast Region where the license recommendation is 17,000, down 800 licenses (-5%) from last year. Reductions were made to manage to HMP objectives and to reduce hunter crowding on some public lands. The Northeast was the only Region to recommend pronghorn license increases.

The estimated statewide post-hunt pronghorn population is 82,000, up from 79,000 in 2018. The sum of statewide population objective ranges for hunted pronghorn herds is 69,000-79,000 combined. Nineteen of 29 (66%) pronghorn DAUs are above the HMP population objective range. Approximately half of the state's pronghorn reside in the Southeast Region, where the limited license numbers are largest. These recommendations maintain licenses as high as is practical without negatively affecting success rates, exceeding landowner tolerance for pronghorn hunters, and attempt to minimize crowding on public lands.

During pre-hunt herd surveys in 2019, conducted with helicopter and fixed-wing aircraft, CPW staff classified 25,700 pronghorn, which is the most ever. The average observed pre-hunt sex ratio was 49 bucks/100 does, which is the same as last year. The average observed pre-hunt fawn ratio was 50 fawns/100 does, up from 43 fawns/100 does in 2018, a result of wetter range conditions.

Pronghorn on the eastern plains are doing quite well while some herds in the western portion of the state have been struggling for about a decade. Colorado offers some excellent hunting for one of North America's most iconic animals.

## **Moose**

Demand far exceeds allocation; 45,000 individuals applied for moose in 2020.

For 2020, we are continuing to increase license recommendations with a total of 520 limited moose licenses, an increase of 12 (+2%) from last year. This recommendation includes 227 bull and either-sex licenses and 293 cow licenses.

Antlerless licenses are the same as last year. Cow moose licenses are designed to manage moose populations toward objectives, keep moose populations within the capability of their habitat, and address moose conflicts in some areas. Cow licenses have lower success rates than bull licenses.

The estimated statewide 2019 post-hunt moose population is 2,900, down from 3,200 in 2018.

We now have moose hunting in 66 GMUs, up from 39 GMUs in 2013. We are fortunate our moose populations continue to do well because many other states are experiencing declines in their moose populations. The growing number and distribution of moose in Colorado have resulted in greater hunting and viewing opportunities.

## **Black Bear**

In 2020, CPW is recommending 20,500 limited licenses for all seasons and methods of take for black bear. Although this recommendation appears as a reduction of over 10,000 licenses from 2019, half of the DAUs have been converted from limited licenses to OTC licenses as a result of the 2020 bear BGSS changes. Once unlimited OTC bear license sales are included, our total license sales in 2020 will likely meet or exceed levels seen in 2019. The statewide harvest objective is projected to be about 1,430 bears and the statewide total mortality objective is approximately 1,910 bears. The availability of unlimited OTC bear licenses in 9 of 17 DAUs is expected to contribute to an increase in harvest.

The 2020 season looks very different for bear hunters under the approved BGSS. Bear season structure changes were aimed at removing unnecessary barriers to bear hunting whenever possible to achieve DAU harvest objectives, while still managing bear hunter crowding during the early seasons or in quality deer and elk units.

Current management objectives are to reduce bear populations in 10 DAUs and stabilize populations at present levels in the remaining 7 DAUs. The DAU objectives are what guided managers' selection between one of the two bear licensing strategies that are available to structure hunting opportunity under the new BGSS.

The licensing strategy known as the "Unlimited Add-on Strategy" offers unlimited OTC licenses in every hunt, except September rifle, for DAUs with a management strategy of reducing bear numbers. Archery and muzzleloader bear licenses require a qualifying deer or elk license, but for each of these methods of take we also offer a limited license version with

no season participation requirements. This effectively means anyone wanting a bear license in these DAUs can get one. The other bear licensing strategy, called the “Limited Strategy”, is applied in DAUs that have a stable population management objective or are already reaching harvest objectives. In these DAUs, all seasons continue to have limited licenses with no season participation requirements, excepting private land only (PLOs) seasons. Under both strategies, September PLO and concurrent rifle PLO bear licenses are unlimited and sold OTC in all 14 DAUs where these seasons are in place.

In the 9 Unlimited Add-on Strategy DAUs, initial limited archery and muzzleloader license levels were set in nearly all DAUs at their historic 2019 OTC with caps license levels to populate these hunts in the first year. In the 8 Limited Strategy DAUs, nearly every limited license hunt code (excluding PLO hunts since those are now unlimited OTC) was kept at 2019 status quo numbers.

License recommendations for limited Sept rifle seasons are status quo in all 17 DAUs with respect to 2019 levels. Fourteen DAUs have PLO hunts and those are unlimited OTC in all cases.

The non-resident price reduction to \$100 in 2019 appears to be responsible for a 30% increase in bear license sales, resulting in the purchase of nearly 6,000 more licenses than in 2018. In 2020 we continue the pricing reduction for non-residents (\$100), further increase the price reduction for residents (\$38), as well as adding new youth bear licenses priced at \$15 for residents and \$50 for non-residents.

## **Conclusion**

The 2020 big game license recommendations provide for an economically significant and diverse amount of big game hunting throughout Colorado. These recommendations and the associated OTC licenses provide the opportunity for more than 300,000 hunters to enjoy the incredible big game resources of the State. They also represent thousands of hours of employees’ collective efforts to conduct herd inventories, obtain harvest estimates, incorporate this information into predictive models, and finally to set limited license recommendations. I am pleased to present these recommendations as a testament to the incredible wildlife resources CPW manages for the enjoyment of the people of Colorado and its visitors.

If you have any questions on this information, or anything else about limited license numbers, feel free to give me a call prior to the Commission meeting. Thank You.

# 2020 BIG GAME LICENSE RECOMMENDATION SUMMARY BY SPECIES

April 24, 2020

DRAFT

## DEER

- CPW is recommending similar total deer licenses as last year; all changes result in an increase of 980 deer licenses (+1%) to 101,500 limited licenses.
- A recommended decrease of 1,700 licenses in the Northwest Region was balanced out by increases of 2,600 deer licenses in the Northeast and Southeast Regions combined.
- Statewide, rifle buck licenses remained nearly the same at 55,400.
- Buck license recommendations were increased in herds that are above Herd Management Plan (HMP) sex ratio objectives. In DAUs where CWD prevalence is greater than 5%, management actions were taken to reduce prevalence, including buck license increases for several herds. Buck license recommendations were reduced in herds that were below sex ratio objective ranges.
- Antlerless license increases are recommended in herds that are performing well and are at or above population objective ranges and reductions are recommended in herds that are below population objective ranges.

DEER	
in 2020	
# of DAUs	# of hunt codes
54	989

## ELK

- CPW is recommending 129,500 limited elk licenses, up 3,000 licenses from last year. However, the limitation of archery hunting in elk DAUs E-16 (Frying Pan), E-24 (Disappointment), E-30 (Hermosa), and E-31 (San Juan) complicates the explanation of total limited license recommendations. Converting what were previously over-the-counter unlimited licenses to limited licenses recommendations results in an increase of 9,000 limited licenses for 2020.
- Continuing with a 17-year trend, rifle elk license recommendations are reduced from last year by 5,200 (-5%) to 102,000.
- Elk license reductions are the result of a combination of herds achieving population objectives through antlerless harvest and low calf/cow ratios reducing population productivity.

## PRONGHORN

- CPW is recommending 25,000 limited pronghorn licenses, down 700 (-3%) licenses from last year.
- The majority of this reduction is in the Southeast Region where the license recommendation is 17,000, down 800 licenses (-5%) from last year. Reductions were made to manage to HMP objectives and to reduce hunter crowding on some public lands.
- The Northeast was the only Region to recommend pronghorn license increases.

## MOOSE

- CPW is recommending 520 limited moose licenses, an increase of 12 (+2%) from last year.
- This recommendation includes 227 bull and either-sex licenses and 293 cow licenses.
- The recommended cow moose licenses are designed to manage moose populations toward objectives and keep moose populations within the capability of their habitat. Additionally, cow licenses have lower success rates than bull licenses.

MOOSE	
in 2020	
# of DAUs	# of hunt codes
12	172

## BLACK BEAR

- CPW is recommending 20,500 limited bear licenses for 2020. Under the new 2020-2024 BGSS, 10 bear DAUs will have unlimited OTC licenses available during archery, muzzleloader, concurrent rifle, and PLO seasons. Since these licenses are no longer "capped" (limited) in number, it is not possible to show a fair comparison of 2019 and 2020 limited licenses.
- 2020 license sales are projected to be higher than 2019 because of the availability of unlimited OTC licenses, unlimited Add-on licenses for hunters that possess qualifying deer and elk licenses, and limited license numbers being similar to 2019.
- CPW continues to encourage bear hunting on private property. All PLO licenses are sold unlimited OTC in all bear DAUs.
- The price of a non-resident bear license continues to be \$100 in 2020. This change was made in 2019 to encourage non-resident participation in bear hunting and resulted in the sale of an additional 6,000 bear licenses in 2019, with over 90% of that increase coming from non-resident sales. Additionally, resident bear licenses are discounted and we have created a new youth bear license for 2020.

# 2020 BIG GAME LICENSE RECOMMENDATION DEFINITIONS

April 24, 2020

DRAFT

- [Goto Species Summaries](#)
- [Goto Definitions](#)
- [Goto Species History](#)
- [Goto Regional Summaries](#)
- [Goto Deer Summaries](#)
- [Goto Elk Summaries](#)
- [Goto Pronghorn Summaries](#)
- [Goto Moose Summaries](#)
- [Goto Black Bear Summaries](#)
- [Goto License Sales Summaries](#)

**Add-on Black Bear License:** Archery and muzzleloader unlimited OTC black bear licenses only available to purchase by hunters who have a deer or elk license for the same manner of take and GMU.

**Age Ratio:** Number of young-of-the-year per 100 females in a herd. Age ratios are observed during big game surveys and provide an estimate of the number of young that were born in summer and survived until the survey. Age ratios are a measure of herd productivity and are used in population modeling.

**Antlered License:** A deer, elk, or moose license that is valid for the take of any animal with an antler or antlers of at least five inches in length.

**Antlerless License:** A deer, elk, or moose license that is valid for the take of any animal without antlers or with antlers of less than five inches in length.

**Black Bear Age and Gender Composition:** Metrics used as indicators of black bear population trajectory in relation to harvest levels. Harvested black bears are divided into 4 age-sex classes (adult male, adult female, subadult male, and subadult female).

**% Adult Male in Harvest:** The adult male segment of a population is the first to be reduced under increasing hunter pressure, therefore proportions of adult males (>5 yr old) in the harvest can indicate stability, increase or decrease in the population.

**% Female in Harvest:** As harvest levels increase and additional adult and sub-adult males are removed, the proportion of females of all ages in the harvest begins to increase. Therefore, proportions of females of all ages in the total harvest can indicate stability, increase or decrease in the population.

**% Adult Females in Female Harvest:** With increasing harvest, younger females are removed and older females (>5 yr old) become more common in the harvest. Thus, the proportion of adult females in the female harvest should rise with increasing harvest rates, indicating stability, increase or decrease in the population.

**Classified Animals:** During big game surveys, animals are categorized by age and sex. That is, animals are identified as adult males, adult females and young-of-the-year. These classifications are then used to calculate sex and age ratios.

**Concurrent Rifle Season:** Limited and unlimited black bear seasons that occur during the regular deer and elk rifle seasons. There are both regular concurrent and PLO concurrent black bear seasons.

**Chronic Wasting Disease (CWD):** A fatal neurological disease that attacks the brains of deer, elk and moose.

**Data Analysis Unit (DAU):** The geographic area that represents the year-round range of a specific big game herd/population. Each DAU is composed of one or more Game Management Units (GMUs). DAUs are used to monitor distinct herds/populations.

**Either-sex License:** A license that is valid for the take of either male or female animals.

**Game Management Unit (GMU):** A defined geographic area that provides a practical framework where management goals can be refined and applied on a finer scale than a DAU, typically through hunting regulations. GMUs are used to monitor hunter distribution.

**Leftover Draw:** Deer and elk applicants unsuccessful in the primary draw have the first chance at the limited licenses that are remaining after the primary draw by selecting Leftover Draw on their application.

**Limited Licenses:** A set (limited) number of licenses are available for specific units and dates for each species, and are initially issued through an application and draw process.

**Manner of Take:** Colorado hunting seasons are based on hunting methods (i.e., archery, muzzleloader and rifle/associated) permissible during each season.

**Modeled Estimates:** Mathematical models that integrate observed data (e.g., sex ratios, age ratios, population estimates, survival estimates, harvest estimates) are used to estimate the population size and demographic composition of each herd. Estimates derived from these models are referred to as modeled estimates.

**Over-the-Counter (OTC) Season:** In contrast to limited seasons, licenses in OTC seasons are not available through the draw. They do not require buying/having a qualifying license, do not use preference points and may be purchased any time through the end of the season. In 2019, the number of licenses available in OTC seasons were either unlimited or capped at a predetermined number. Starting in 2020, there will no longer be OTC with caps seasons.

**Plains Units:** GMUs east of Interstate I-25 except unit 140.

**Private Land Only (PLO) License:** Licenses that are only valid on private land.

**Population Estimate:** The estimate of the number post-season (winter) animals in a herd. CPW estimates the size of each herd annually based on population models.

**Population Objective:** The target number of animals in a herd. Population objectives are expressed as ranges and are established in the Herd Management Plan (HMP) for each herd. License numbers and hunting strategies are designed to reach or maintain the population objective of each herd.

**Post-hunt:** The period after the hunting seasons. Most big game populations are surveyed post-hunt (in the winter), when they are concentrated at lower elevations in open terrain by snow, in order to estimate winter population levels and demographics.

**Pre-hunt:** The period before the hunting season. Many pronghorn surveys are conducted pre-hunt (in the summer) to estimate summer population levels and demographics.

**Primary Draw:** The first, main big game draw of the year for hunters applying for limited hunting licenses.

**September Rifle Season:** Limited rifle black bear seasons that occur during the month of September (before the regular deer and elk rifle seasons). The majority of black bear harvest occurs during these seasons and, therefore, they have the largest effect on black bear management.

**Sex Ratio:** Number of males per 100 females in a herd. Sex ratios are observed during big game surveys and used in population models. Sex ratio objectives are established for each herd in a Herd Management Plan. Hunting licensing numbers and strategies are established to achieve and maintain these objectives.

**Unlimited Licenses:** Licenses that are not restricted in number. They are not available through the draw.

**Weighted Average:** An average that is calculated taking population size into account, so that larger populations contribute more to the average than smaller populations (i.e., populations influence the average in proportion to their size).

**West of I-25 Units:** GMUs west of Interstate I-25 and unit 140.

[Goto END](#)

\* The 2020-2024 Big Game Season Structure created unlimited OTC black bear licenses in DAUs which have a management strategy of reducing bear populations and where harvest objectives are not being met.

positive % change = increase in licenses  
negative % change = decrease in licenses

\*\* Includes only Concurrent Rifle Black Bear licenses.

#### #240 - VACANT

#### #241 - SPECIAL RESTRICTIONS

- A. No person shall hunt, take or harass a bear in its den.
- B. No cubs shall be killed nor shall any black bear accompanied by one (1) or more cubs be killed. As used herein a "cub" shall mean any black bear less than one (1) year of age.
- C. Inspection and Seal Required.
  1. Black bear taken by licensed hunters shall be personally presented to the Division or other official designated by the Division for inspection and sealing within 5 working days after the taking thereof. Bear heads and hides must be unfrozen when presented for inspection. If not unfrozen, the Division may retain heads and hides as necessary for thawing sufficient to extract a premolar tooth. No fee shall be required for the inspection and issuance of a legal possession seal, which shall remain attached to the hide until such hide is tanned.
  2. Black bears shall not be transported, shipped or otherwise taken out of Colorado until the hide and skull are inspected and sealed by authorized personnel of the Division. Possession of any bear hide not having a seal attached within the 5 working days shall be unlawful and such hide shall become the property of the State.

3. Inspection and sealing shall be arranged by contacting the Division Officer or the Division office.
  4. A mandatory check report shall be accurately completed by the hunter at the time of inspection.
  5. At the time of the mandatory check, the Division shall be authorized to extract and retain a premolar tooth.
- D. Individuals taking black bear under authority of §33-3-106(3) shall report the bear within five (5) days after the taking thereof as required by said statute and the carcass, hide and other parts of the bear shall remain the property of the state.

**3. Private Land Only, Mule Deer Only Season Dates, Units (as described in Chapter 0 of these regulations), Limited Licenses.**

- a. All applicants for "Private Land Only" licenses must obtain permission to hunt from at least one private landowner within the game management unit prior to hunting.
- b. Private land only licenses are valid on all private land within the game management unit upon which the license holder has permission to hunt.

Unit(s)	Hunt Code	Season Dates	Licenses (2020)
951 - Those portions bounded on the north by Riverside Inlet Canal, south bank of Riverside Reservoir and Riverside Outlet Canal; on the east by Morgan CR 2 and Colo 144; on the south by I-76; on the west by Weld CR 386, US 34 and Weld CR 69.	DM951P7R	10/24/2020 – 11/03/2020 and 12/01/2020 - 12/14/2020	<u>20</u>

**#251-#253 - VACANT**

**ARTICLE IX - ELK**

**#254 - ANTLER POINT RESTRICTIONS BY UNIT - ELK**

- A. All antlered elk taken in the following game management units during any established season, including archery, muzzle-loading rifle or rifle seasons, shall have four (4) or more points or a brow tine on one antler: GMU's 3, 4, 5, 6, 7, 8, 9, 11, 12, 13, 14, 15, 16, 17, 18, 19, 21, 22, 23, 24, 25, 26, 27, 28, 30, 31, 32, 33, 34, 35, 36, 37, 38, 41, 42, 43, 44, 45, 47, 52, 53, 54, 55, 59, 60, 62, 63, 64, 65, 66, 67, 68, 70, 71, 72, 73, 74, 75, 77, 78, 79 (except as referenced in 254.D), 80,

81, 82 (except as referenced in 254.D), 83, 85, 86, 131, 140, 161, 171, 181, 191, 211, 214, 231, 301, 361, 371, 411, 421, 441, 444, 471, 511, 521, 551, 581, 591, 681, 691, 711, 741, 751, 771, 851, and 861.

- B. There are no antler point restrictions for elk taken during any established season, including archery, muzzle-loading rifle or rifle seasons, in the following game management units: 1, 2, 10, 20, 29, 39, 40, 46, 48, 49, 50, 51, 56, 57, 58, 61, 69, 76, 84, 201, 391, 461, 481, 500, 501, 561, 591, 682, 791, or in any unit east of I-25 except 140.
- C. There are no antler point restrictions for elk on Wildlife Ranching properties during Wildlife Ranching seasons.
- D. There are no antler point restrictions for elk licenses issued for the following hunt codes: EF682P5R, EM682P5R, EM682P6R.

**#255 - ARCHERY ELK SEASONS - ONLY LAWFUL HAND HELD BOWS MAY BE USED TO HUNT OR TAKE ELK DURING THE FOLLOWING SEASONS:**

- A. **Early Seasons - None**
- B. **Regular Archery Elk Seasons**

#### #257.5 - SPECIAL RESTRICTIONS

##### A. Unit 512 - Air Force Academy

Hunters must apply in person, no later than May 31 annually to participate in a random drawing to be placed on a priority list of hunters. Applications along with a non-refundable application fee not to exceed \$10.00 will be accepted at the Academy's Outdoor Recreation Center, Building 5136 - Community Center Drive, AFA, Colorado Springs.

The first 15 hunters drawn will be placed on the list and will be notified of their placement by June 15 annually. When elk are available to be hunted, up to 4 hunters will be called. After obtaining a license, paying a fee not to exceed \$30.00 to the Academy and receiving a safety briefing, hunters will be escorted on the hunt. Hunters may decline one opportunity to hunt and hold their place on the list. Hunts will continue when possible until (30) antlerless elk have been taken.

##### B. Units 79 (south of Colo 112), 82, 682 and 791 – San Luis Valley Damage Elk Hunts

1. The purpose of these hunts is to provide flexibility in managing damage by elk and maintain landowners' rights to determine who may enter their property. Most license vouchers may be issued to friends and family of the landowner. Opportunities for non-associated public hunters may exist and will be selected from a list of interested hunters.
  2. License vouchers may be transferred one time only, and shall only be transferred by the landowner to the hunter that will use the voucher to purchase the license. Third-party brokering of landowner vouchers is not permitted. Violation of this subsection shall invalidate the applicable landowner voucher and any license purchased with it.
  3. Public hunters must apply no later than July 15 annually, to participate in a random drawing to be placed on a priority list of hunters. Applications will be accepted at the Monte Vista Service Center at 0722 S Rd. 1 E, Monte Vista.
  4. Hunters drawn will be placed on the list and the top 10 hunters on the list will be notified of their placement no later than August 15 annually. When elk are available to be hunted, up to 4 hunters will be called. Hunters may decline one opportunity to hunt and hold their place on the list. Hunts will be conducted on an as-needed basis to alleviate game damage.
- C. Units 80, 82, and 83 – San Luis Valley US Fish and Wildlife Refuge Permits
1. Starting in 2016, the United States Fish and Wildlife Service (USFWS) will allow a limited number of elk hunters access to hunt on the Alamosa, Baca, and Monte Vista National Wildlife Refuges. To be eligible for an access permit, hunters must hold one of the following elk licenses in either GMU 80, 82, or 83:
    - a. Either-sex archery;
    - b. Antlered muzzleloader;
    - c. Antlered or either-sex first rifle;
    - d. Antlered or either-sex fourth rifle;
    - e. Any limited antlerless license.
  2. To be entered into the drawing, eligible hunters must email the following address starting the day after left-over license day: [montevista.wildlife@state.co.us](mailto:montevista.wildlife@state.co.us). Emailed entries will only be accepted for five days after left-over license day. Permits for these three refuges will then be issued at the Monte Vista Service Center via a random drawing on August 15, 2018, held under the direct supervision of the area wildlife manager.

## **ARTICLE X - PRONGHORN**

### **#261 - ARCHERY PRONGHORN SEASONS ONLY LAWFUL HAND HELD BOWS MAY BE USED TO HUNT OR TAKE PRONGHORN DURING THE FOLLOWING SEASONS:**

#263 - 269 VACANT

**ARTICLE XI - MOOSE**

**#270 - MOOSE SEASONS, LICENSES, AND SPECIAL RESTRICTIONS**

**A. Antlerless Archery, Muzzle-loading firearms (rifle and smoothbore musket), and Rifle Season Dates, Units and Limited Licenses.**  
 Allocation of these licenses will float between the moose seasons in accordance with the hunt code chosen by successful applicants.

C. Special Restrictions

1. All moose licensees shall complete and return a harvest questionnaire provided by the Division within 30 days after the close of their hunting season. Any moose licensee who does not complete and return the mandatory questionnaire as required shall not be considered for any future moose license.
2. All moose harvested through hunting shall be submitted for inspection to an employee of the Division on or before the 5th working day after the taking thereof. Any licensee who takes an antlered moose shall personally present the head, with antlers attached, to any Division office. Any licensee who takes an antlerless moose shall personally present the head to any Division office. Moose heads must be unfrozen when presented for inspection. If not unfrozen, the Division may retain heads as necessary for thawing sufficient to extract the incisor teeth. A mandatory check report shall be completed at the time of inspection.
3. At the time of the mandatory check, the Division shall be authorized to extract and retain the incisor teeth.

**ARTICLE XII - SPECIAL HUNTING SEASONS/LICENSES FOR BIG GAME**

**#271 - BIG GAME ANIMALS CAUSING DAMAGE AND BIG GAME POPULATIONS OVER OBJECTIVE**

A. Special Population Management Seasons for Big Game Ungulates

1. The Director shall have the authority to establish special management seasons for antlerless or female big game ungulates in specific game management units or portions thereof which significantly exceed the population objective, when the anticipated harvest from the current year's archery, muzzle-loading and regular rifle seasons did not occur. Provided further that the Director shall have the authority to establish these hunts between November 16 and February 28, to specify a time period for each of these hunts but not to exceed ten days each, and shall authorize hunters to use designated unfilled big game licenses for these hunts and units.
2. The Director shall have the authority to allocate antlerless deer and/or elk licenses on existing Ranching for Wildlife properties located in game management units where deer or elk populations significantly exceed the population objective. These licenses shall be in addition to the number of licenses allocated to each ranch pursuant to the Cooperative Agreement established in #210(A)(2). The additional allocation and use of the antlerless licenses provided for in this section shall be in the same proportion, by species (not sex), as established in the ranch's respective Cooperative Agreement and subject to the following provisions:
  - a. No ranch shall be required to accept any additional antlerless licenses.
  - b. The public allocation of such additional antlerless licenses shall only be offered to hunters who have successfully drawn antlered, either-sex or antlerless licenses for the same species on the ranch. Public hunters who choose to purchase one additional antlerless license from the Division shall be required to use the additional license during the season established for the license for which they drew. No more than one additional antlerless license will be available to any public hunter.

B. Special Game Damage Seasons for Big Game Ungulates

1. The Director shall have the authority to establish special hunting seasons for big game ungulates, between August 15 and February 28, when necessary to control damage to property. Seasons shall be for the taking of antlerless or female animals unless the Director has determined that the taking of antlered animals is necessary in order to alleviate the damage.
  - a. Game damage hunts are limited to a maximum of 50 licenses per species per Game Management Unit or 30 percent of the antlerless, either-sex, or doe licenses issued for the DAU (whichever is greater), unless a distribution management plan establishing a different percentage has been approved by the Parks and Wildlife Commission or additional permits are approved by the Director or his designee.
  - b. On private lands and Russell Lakes, Rio Grande and Higel State Wildlife Areas, the Area Wildlife Manager (AWM) is authorized to conduct these seasons based upon the following criteria:
    1. The AWM finds that such a season would be consistent with the distribution management plan approved by the Parks and Wildlife Commission.
    2. When there is no approved distribution management plan, the AWM finds that a season will reduce or eliminate damage for which the Division is liable, and that holding a season would be desirable considering
      - aa. The species and number of animals involved.
      - bb. The number of animals that would have to be removed to reduce or eliminate damage.
      - cc. The location of the damage problem.
      - dd. The type and extent of damage.
      - ee. The time of year and its relationship to the life history of the animals.
      - ff. The length of time such damage will continue without big game removal.
      - gg. Management closures, hunting seasons and other public use.
      - hh. The effect on population objectives for the GMU and DAU.
      - ii. Whether landowner operations (e.g., harvesting) or critical wildlife biological activities (e.g., fawning) would be interrupted.
      - jj. Safety risks.
      - kk. Any other pertinent factors.

3. The Area Wildlife Manager shall provide the landowner with special application forms for distribution to individuals of their choice. Participants shall submit the completed application form with payment to the Division office indicated on the application.
  4. In the event the landowner cannot secure enough people to effect an adequate harvest the Division can assist in locating individuals.
- c. The Division shall
1. Verify that damage or conflicts are occurring or can reasonably be anticipated to occur.
  2. Designate what area shall be open to hunting.
  3. Determine the manner of hunting that will be permitted.
  4. Determine the number of hunters allowed to hunt in each designated area.
- d. Hunting will be done under the direction of a District Wildlife Manager, following approval by the owner of land where such damage is occurring.
- e. Hunters shall hunt in designated areas and on the dates indicated on the license.
1. A map or a written description of the designated area open to hunting (which would include, but would not be limited to landowner(s) name, game management unit, township, range and section(s) and/or identification of landmarks such as roads, rivers, or fence lines which coincide with boundaries), will be provided to each licensed hunter by the Division.
- f. Any person who purchases a license for a game damage season shall be required to complete a Division harvest survey form and return it to the Area office that is nearest the location of the hunt no later than 5 days after the season ends.

C. Special Game Damage Licenses for Bear and Mountain Lion

1. The Director shall have the authority to establish special hunting licenses for mountain lion and bear, which allow for take in excess of the otherwise applicable limited license numbers or quotas, when necessary to control damage to private property.
  - a. AWMs are authorized to issue these bear and mountain lion licenses to address specific animals determined after an investigation to be causing damage to private property.
    1. Bear or mountain lion licenses above the established limited license numbers or quota for the area may be issued only where necessary to take specific animals determined after an investigation to be causing damage to private property.
    2. Bear hunting authorized under this provision will be conducted between September 2 and the end of the fourth regular rifle season annually.

3. Mountain lion hunting authorized under this provision will be conducted during established lion seasons.
  4. Licenses will be issued only if licenses are not otherwise available for purchase under standard license distribution methods or where mountain lion quotas have been reached in the area.
  5. License will be restricted by manner of take, period of time within the dates specified above, and location within the GMU(s) or DAU(s) in question as necessary to ensure the offending animal is appropriately targeted.
  6. Hunting will be conducted under the direction of a District Wildlife Manager.
- b. Any person who purchases a license shall be required to complete a Division harvest survey form and return it to the Area office that is nearest the location of the hunt no later than 5 days after the end of the hunting period authorized by the license.
  - c. Bear and mountain lion taken pursuant to a license issued under this provision shall not be counted against the annual bag and possession limit for the species in question.

D. Special Hunting Season In Game Management Unit 20 For Cow Elk Normally Not Available For Harvest During Regular Or Late Big Game Seasons:

1. Season dates, license types, permit numbers will be established by the Director or his designee.
2. The Division will designate the area open to hunting, manner of take, and season dates which are necessary to achieve its population management objective for this population of elk. Hunting shall occur only during the designated time periods indicated on the hunter's license and only in those areas specifically designated on the map provided by the Division. Special Unit 20 cow elk hunts shall be established based on the following criteria: (a) the hunt does not fall within the criteria established for game damage hunts; (b) snow ground cover and/or other conditions favor are expected to favor successful hunting; (c) elk must be available to hunters in portions of Unit 20 which are open to hunter access; and (d) no special season will be created under this regulation which would extend beyond February 15th.
3. Eligible hunters will be selected in the following priority: a) from the list of hunters who applied for a Unit 20 limited elk license and were unsuccessful; and b) from a new list of hunters established by the Division Northeast Regional office pursuant to notice in local newspapers. Such list will be established on a first-come, first-served basis.
4. Individuals who participate in this special hunt may also participate in any other season for elk if otherwise eligible to do so.

E. Special Hunting Licenses and Seasons For Deer and Elk in Urbanized Areas:

1. The Division Director (or designee) shall have the authority to establish special deer and elk hunting seasons between August 15 and February 28 annually to achieve population management objectives as specified in Division approved county or municipal management plans. Seasons shall be for the taking of antlerless animals unless the Director determines that

the taking of antlered animals is necessary per the issues and goals brought forth in the Division approved management plan.

2. Counties or municipalities must submit a proposed management plan to the Division, which includes the following:
  - a. Explanation of the need and scope of the issues (i.e. habitat degradation, human conflicts, human health and safety issues, etc);
  - b. Estimated population of deer or elk creating the issue and a target population number being sought post removal;
  - c. Season dates;
  - d. Manner of take;
  - e. Numbers of licenses and projected harvest;
  - f. Geographic location and description of hunting area(s); and
  - g. Method for selecting eligible hunters.
3. Management plans will be evaluated on the merits of furthering goals for suburban deer or elk management and in relation to the appropriate Division Big Game Herd (DAU) Management Plan. The Director (or designee) shall provide the county or municipality with special application forms for distribution to individuals as specified within the submitted and approved management plan. Participants shall submit the completed application to the Division to obtain the appropriate hunting license.
4. The participating county or municipality will assume full responsibility for the plans and elements therein. The Division will be available to provide technical assistance to the county or municipality in preparing the management plan.
5. The county or municipality may not charge hunters a fee beyond what is required to cover their administrative costs to run the program.
6. All participating counties, municipalities and individuals are required to follow all applicable state statutes and regulations. No county or municipality will allow, encourage, or otherwise promote violations thereof.
7. The Division can unilaterally, without prior notification, terminate or void any applications given to a county or municipality prior to their redemption for a license for issues related to human health, safety, or any wildlife related violations associated with the management plan implementation, or documented deviation from the management plan as it was submitted to the Division. Management plans may be amended with Division approval.
8. Individuals who participate in these special hunts may also participate in any other season for deer or elk if otherwise eligible to do so.
9. Any county or municipality receiving licenses for a special hunting season for deer and elk in urbanized areas shall be required to complete a Division harvest survey form and return it to the Area office that is nearest to the location of the hunt no later than 5 days after the season ends.

## **#272 BIG GAME DISEASE/ANIMAL HEALTH SEASONS**

1. Special Hunting Seasons for Disease Management in Big Game
  - a. The Director shall have the authority to establish special hunting seasons for big game, when hunting harvest has not been adequate to reduce the incidence of disease, to reduce emigration of infected animals, or to otherwise control expansion of the disease.

1. No more than 200 licenses per species shall be issued annually per Game Management Unit (GMU) unless authorized by the Director
2. Seasons shall be for the taking of antlerless or female animals unless the Director has authorized the issuance of male (antlered) licenses. No more than 10% of the licenses shall be issued for male (antlered) animals unless authorized by the Director.
3. Licenses will be valid only in the unit(s) specified on the license. Licenses may be restricted to specific properties or areas as determined by the Area Wildlife Manager.
4. License fees may be reduced when authorized by the Director, when necessary to ensure sufficient hunter participation, provided that no license is to be sold for less than \$5.00. License fees shall be set to ensure recovery of the cost of the retail and system agent commissions.
5. Multiple carcass tags may be issued with each license, as authorized by the Director. Provided further that the payment of separate license fees shall be required if licenses for more than one species are to be sold.
6. Any licensee who takes deer or elk during any such season for the purpose of Chronic Wasting Disease (CWD) management shall submit the head from all animals taken when required to do so as a condition of the license, to the testing site specified at the time the license is issued, within 5 days after harvest. Hunters must complete the special survey tag available at any head collection site and attach it to the animal's head. Antlers and capes from harvested deer may be removed by hunters before submitting heads for sampling.

**ARTICLE XIII - VACANT**

**ARTICLE XIV - VACANT**

**Basis and Purpose:**

These regulations amend Chapter W-2 - Big Game - of the Parks and Wildlife Commission regulations and are necessary to properly manage big game populations in Colorado. They establish limited license numbers for deer, elk, pronghorn, moose, and black bear during seasons, which were adopted in January 2020; and include licenses for archery, muzzleloading, early, regular, plains, late rifle and private land only seasons with respect to each species. Limited license numbers are set for specific game management units or groups of units. Limited license numbers are established to maintain big game herds at or near long-term population objectives, and, in the case of antlered deer, antlered elk, buck pronghorn and moose they are also set to achieve sex ratio objectives. The herd objectives are intended to maintain healthy populations, provide a diversity of hunting opportunities for residents and nonresidents, allow and maintain public recreational opportunity, minimize or control local game damage situations on private land and provide opportunity for landowners to cooperatively manage wildlife with the Division through the Ranching for Wildlife program. These resulting limited license numbers take into account harvest estimates and hunter success rates, wildlife counts and surveys, as well as impacts of winter weather and predation on big game populations.

As is the case each year, this effort represents the culmination of numerous hours of work by various Division employees involved in the accumulation and analysis of data and a great deal of time spent with interested publics explaining both the recommendations and the rationale behind them. Further information regarding specific highlights of these annual changes are provided below.

**Deer**

Approximately 212,000 hunters applied for Colorado deer licenses in 2020. The majority of deer hunting in Colorado is managed by limited licenses; the only exceptions are over-the-counter white-tailed deer licenses available in the Southeast Region.

CPW staff are recommending similar total deer licenses as last year; all changes result in an increase of 980 deer licenses (+1%) to 101,500 limited licenses. A recommended decrease of 1,700 licenses in the Northwest Region was balanced out by an increase of 2,600 deer licenses in the Northeast and Southeast Regions combined.

Statewide, rifle buck licenses remained nearly the same at 55,400. Buck license recommendations were increased in herds that are above Herd Management Plan (HMP) sex ratio objectives. In Data Analysis Units (DAUs) where CWD prevalence is greater than 5%, management actions were taken to reduce prevalence, including buck license increases for several herds. Buck license recommendations were reduced in herds that were below sex ratio objective ranges.

The statewide total rifle doe license recommendation is 16,400, up from 16,100 (+300, +2%). Antlerless license increases are recommended in herds that are performing well and are at or above population objective ranges and to address game damage. Alternatively, these recommendations keep regular season doe licenses at the minimum of 10 licenses per hunt code for all deer DAUs west of I-25 that are below population objective. In these below-objective herds, the majority of doe licenses are private-land-only licenses to address game damage. Private-land-only licenses and licenses with special restriction to address deer conflicts near towns make up approximately 70% of the doe licenses in below-objective herds.

After large deer population declines in 2007, the total deer population has averaged 420,000 over the last 10 years. The statewide post-hunt 2019 deer population estimate is 418,000, down from 433,000 last year. Population estimates are still far below the sum of statewide population objective ranges of

494,000-558,000 for all 54 deer herds combined. In 2019, 25 of 54 (47%) deer DAUs are below their population objective ranges. Population objectives that are appreciably higher than population estimates reflect CPW's desire to stabilize, sustain, and increase deer populations.

Diverse habitat types and environmental conditions around the state create considerable geographic variability in population performance. Many deer herds on the plains and central mountains are performing well. There is still reason for concern about declines, particularly in many of the large westernmost herds in Colorado.

CPW annually monitors well over 1,000 radio-collared mule deer in five Intensive Mule Deer Monitoring Areas to estimate survival. CPW also conducts post-hunt herd inventories, primarily with helicopters, to estimate the sex ratios of males/100 females and the age ratios of young/100 females. In addition to survival rates, these ratios are needed to estimate population size using population models.

The average of HMP sex ratio objectives for deer herds statewide is approximately 30 bucks/100 does. During the post-hunt herd inventories in 2019, CPW staff classified 69,000 deer and observed an average sex ratio of 32 bucks/100 does, which is down from 35 bucks/100 does in 2018. Reproduction and fawn survival to December was similar this year compared with the previous year, the statewide average observed age ratio from helicopter inventory was 58 fawns/100 does compared with 59 fawns/100 does in 2018.

Buck/doe ratios have shown a response to our management actions, and Colorado remains a premier destination for deer hunters.

## **Elk**

In 2020, approximately 215,000 hunters applied for Colorado limited elk licenses. All rifle antlerless, muzzleloader, first, fourth, and late season elk licenses are limited. Archery licenses and second and third rifle bull seasons in many Game Management Units (GMUs) are also limited.

CPW is recommending 129,500 limited elk licenses, up 3,000 licenses from last year. However, the limitation of archery hunting in elk DAUs E-16 (Frying Pan), E-24 (Disappointment), E-30 (Hermosa), and E-31 (San Juan) complicates the explanation of total limited license recommendations. Converting what were previously unlimited over-the-counter (OTC) licenses to limited licenses recommendations results in an increase of 9,100 limited licenses for 2020. Without these new licenses; however, the total would be down 6,000 licenses.

Continuing with a 17-year trend, rifle elk license recommendations are reduced from last year by 5,200 (-5%) to 102,000. Antlerless licenses make up the majority of this reduction, down 5,100 (-8%) from last year. Muzzleloader license recommendations are reduced concomitantly by 500 (-4%). Rifle and muzzleloader elk license reductions are the result of a combination of herds achieving population objectives through antlerless harvest and low calf/cow ratios reducing population productivity.

The statewide elk population is stable. The 2019 estimate of 293,000 is up slightly from the 287,000 in 2018. The sum of Colorado's post-hunt population objective ranges for elk statewide is 234,000-284,000 for all 42 elk herds combined. The sum of statewide objective ranges is partially based on historic HMPs. Plans written before 2001 were written with outdated population models that underestimated elk numbers; as we update plans, we expect population objectives to change. Because season and license setting is designed to use antlerless harvest to bring elk populations to herd objectives, further reductions in antlerless licenses are anticipated in the future as more elk populations reach objectives or population objectives increase.

As we've intentionally reduced elk populations to achieve population objectives, hunters and outfitters increasingly have expressed concern that elk populations are becoming too low in some herds, despite the fact that 24 of 42 (57%) elk herds are above their current population objective ranges. Nonetheless, public perception of the desired number of elk in Colorado varies. CPW gives serious consideration to

changing population objectives in herds as HMPs are updated and tries to balance public interests of landowners, local communities, public land management agencies, and hunters. Long-term experience with balancing these interests has informed CPW on the upper and lower social thresholds for elk population size in many herds, which benefits us greatly in herd management planning efforts.

The average of post-hunt sex ratio objectives in totally limited elk DAUs and expected sex ratios in over-the-counter DAUs for elk herds statewide is approximately 24 bulls/100 cows. In 2019, during the post-hunt herd inventories, CPW staff used helicopter surveys to classify 84,000 elk and observed a statewide average sex ratio of 22 bulls/100 cows, compared to 24 bulls/100 cows in 2018.

During these surveys over the past decade CPW has observed declining calf/cow ratios in the southern half of the state. In 2019, we observed the lowest statewide average calf/cow ratio ever at 37 calves/100 cows. The Southwest Region was the lowest at 30 calves/100 cows with the Northwest Region having the highest average at 45 calves/100 cows. Northern Colorado historically has had higher calf ratios by about 10 calves/100 cows. Elk research and continued management changes are necessary since calf production remains low in many herds. Low calf ratios reduce the number of elk licenses CPW can issue.

The 2019 reductions in antlerless licenses are consistent with licensing trends of the last 17 years because many herds are near the desired population size and have low calf ratios. Having a combination of units that are limited in all seasons and units with both limited and over-the-counter hunting seasons allows us to offer a very wide range of hunting opportunities on the nation's largest elk population.

## **Pronghorn**

In 2020, approximately 87,000 hunters applied for Colorado limited pronghorn licenses. Pronghorn applications have increased substantially for the last several years. The majority of pronghorn licenses are limited, with the notable exception of over-the-counter archery licenses available in 70% of GMUs.

CPW is recommending 25,300 limited pronghorn licenses, down 700 (-3%) licenses from last year. The majority of this reduction is in the Southeast Region where the license recommendation is 17,000, down 800 licenses (-5%) from last year. Reductions were made to manage to HMP objectives and to reduce hunter crowding on some public lands. The Northeast was the only Region to recommend pronghorn license increases.

The estimated statewide post-hunt pronghorn population is 82,000, up from 79,000 in 2018. The sum of statewide population objective ranges for hunted pronghorn herds is 69,000-79,000 combined. Nineteen of 29 (66%) pronghorn DAUs are above the HMP population objective range. Approximately half of the state's pronghorn reside in the Southeast Region, where the limited license numbers are largest. These recommendations maintain licenses as high as is practical without negatively affecting success rates, exceeding landowner tolerance for pronghorn hunters, and attempt to minimize crowding on public lands.

During pre-hunt herd surveys in 2019, conducted with helicopter and fixed-wing aircraft, CPW staff classified 25,700 pronghorn, which is the most ever. The average observed pre-hunt sex ratio was 49 bucks/100 does, which is the same as last year. The average observed pre-hunt fawn ratio was 50 fawns/100 does, up from 43 fawns/100 does in 2018, a result of wetter range conditions.

Pronghorn on the eastern plains are doing quite well while some herds in the western portion of the state have been struggling for about a decade. Colorado offers some excellent hunting for one of North America's most iconic animals.

## **Moose**

Demand far exceeds allocation; 45,000 individuals applied for moose in 2020.

For 2020, we are continuing to increase license recommendations with a total of 520 limited moose licenses, an increase of 12 (+2%) from last year. This recommendation includes 227 bull and either-sex licenses and 293 cow licenses.

Antlerless licenses are the same as last year. Cow moose licenses are designed to manage moose populations toward objectives, keep moose populations within the capability of their habitat, and address moose conflicts in some areas. Cow licenses have lower success rates than bull licenses.

The estimated statewide 2019 post-hunt moose population is 2,900, down from 3,200 in 2018. We now have moose hunting in 66 GMUs, up from 39 GMUs in 2013. We are fortunate our moose populations continue to do well because many other states are experiencing declines in their moose populations. The growing number and distribution of moose in Colorado have resulted in greater hunting and viewing opportunities.

## **Black Bear**

In 2020, CPW is recommending 20,500 limited licenses for all seasons and methods of take for black bear. Although this recommendation appears as a reduction of over 10,000 licenses from 2019, half of the DAUs have been converted from limited licenses to OTC licenses as a result of the 2020 bear BGSS changes. Once unlimited OTC bear license sales are included, our total license sales in 2020 will likely meet or exceed levels seen in 2019. The statewide harvest objective is projected to be about 1,430 bears and the statewide total mortality objective is approximately 1,910 bears. The availability of unlimited OTC bear licenses in 9 of 17 DAUs is expected to contribute to an increase in harvest.

The 2020 season looks very different for bear hunters under the approved BGSS. Bear season structure changes were aimed at removing unnecessary barriers to bear hunting whenever possible to achieve DAU harvest objectives, while still managing bear hunter crowding during the early seasons or in quality deer and elk units.

Current management objectives are to reduce bear populations in 10 DAUs and stabilize populations at present levels in the remaining 7 DAUs. The DAU objectives are what guided managers' selection between one of the two bear licensing strategies that are available to structure hunting opportunity under the new BGSS.

The licensing strategy known as the "Unlimited Add-on Strategy" offers unlimited OTC licenses in every hunt, except September rifle, for DAUs with a management strategy of reducing bear numbers. Archery and muzzleloader bear licenses require a qualifying deer or elk license, but for each of these methods of take we also offer a limited license version with no season participation requirements. This effectively means anyone wanting a bear license in these DAUs can get one. The other bear licensing strategy, called the "Limited Strategy", is applied in DAUs that have a stable population management objective or are already reaching harvest objectives. In these DAUs, all seasons continue to have limited licenses with no season participation requirements, excepting private land only (PLOs) seasons. Under both strategies, September PLO and concurrent rifle PLO bear licenses are unlimited and sold OTC in all 14 DAUs where these seasons are in place.

In the 9 Unlimited Add-on Strategy DAUs, initial limited archery and muzzleloader license levels were set in nearly all DAUs at their historic 2019 OTC with caps license levels to populate these hunts in the first year. In the 8 Limited Strategy DAUs, nearly every limited license hunt code (excluding PLO hunts since those are now unlimited OTC) was kept at 2019 status quo numbers.

License recommendations for limited Sept rifle seasons are status quo in all 17 DAUs with respect to 2019 levels. Fourteen DAUs have PLO hunts and those are unlimited OTC in all cases.

The non-resident price reduction to \$100 in 2019 appears to be responsible for a 30% increase in bear license sales, resulting in the purchase of nearly 6,000 more licenses than in 2018. In 2020 we continue

the pricing reduction for non-residents (\$100), further increase the price reduction for residents (\$38), as well as adding new youth bear licenses priced at \$15 for residents and \$50 for non-residents.

## **Conclusion**

The 2020 big game license recommendations provide for an economically significant and diverse amount of big game hunting throughout Colorado. These recommendations and the associated OTC licenses provide the opportunity for more than 300,000 hunters to enjoy the incredible big game resources of the State. They also represent thousands of hours of employees' collective efforts to conduct herd inventories, obtain harvest estimates, incorporate this information into predictive models, and finally to set limited license recommendations.

The statements of basis and purpose for these regulations can be obtained from the Colorado Division of Parks and Wildlife, Office of the Regulations Manager by emailing Krista Heiner at [krista.heiner@state.co.us](mailto:krista.heiner@state.co.us). The statements of basis and purpose are not available at the Division of Parks and Wildlife headquarters due to the closure of these facilities to the public in light of the COVID-19 pandemic and Executive Order D 2020 017.
