Subject: Draft Eldorado Canyon State Park Management Plan

Eldorado Canyon State Park (ECSP) is a well-visited state park thanks to its world-renowned rock climbing, creekside picnic spots, impressive views, scenic trails, and proximity to a major population center. The ECSP Management Plan will serve as the foremost guiding document for Eldorado Canyon State Park. The purpose of developing a state park management plan is to plan for both the public enjoyment and protection of the state park's resources.

The draft ECSP Management Plan will be available for public input April 26-May 25th. The draft plan can be found on CPW's website: <https://cpw.state.co.us/placestogo/parks/EldoradoCanyon/Pages/Eldorado-Canyon-State-Park-Management-Plan.aspx>. The website also has comment forms for anyone to provide input on the draft plan. I look forward to sharing an overview of the planning process and draft plan with you as an information item on Wednesday May 5th.

Eldorado Canyon State Park is located in south central Boulder and northern Jefferson counties with public and private land bordering the park. The small-unincorporated town of Eldorado Springs is located just outside the main entrance.
