

# Coyotes

*Coyotes are members of the dog family. They are wild. They cannot be pets. Domestic dogs like poodles and beagles can be pets.*

*Coyotes are about the size of a medium dog. They weigh 20 to 50 pounds. Sometimes they look bigger because of their thick tan or gray fur.*

*Coyotes can live almost anywhere. They live in deserts, forests, mountains, and even cities! They will eat almost anything. They eat mice, plants, rabbits, squirrel, and even pets!*
