TO BE CONSIDERED AS A RECORD FISH BY LENGTH FOR COLORADO IN ANY OF THE ABOVE CATEGORIES:

- 1 Fish must be taken by legal angling methods from Colorado waters. Angler must have been correctly following all applicable angling regulations and licensing requirements at the time of catch.
- 2 Fish may have been caught in either public or private fishing waters.
- 3 Fish **MUST BE RELEASED** in order to qualify.
- 4 An official entry form must be used. Photograph of fish on a length measuring device (behind or under the fish, not following the curvature of the fish) must accompany entry. See CPW fishing app or CPW website for measuring instructions.
- 5 Entry must be accompanied by signature of one person (no relatives) who witnessed measuring.

HOW TO MEASURE A FISH'S LENGTH

To accurately measure a fish for a length record:

- You **MUST** place the fish directly on the measuring device (ruler, tape measure, etc.). As pictured above, the **measuring device shall be behind or under the fish and not following the curvature of the fish.**
- You **MUST** align the fish at a clearly marked area of the measuring device. In the image above, the 1-inch mark is used to clearly and accurately indicate the starting point for measurement.
- You **MUST** place fish on its side with the jaw closed.
- You **MUST** squeeze the tail fin together to obtain the maximum overall length.
- You **MUST** measure a straight line from the tip of the snout to the extreme tip of the tail fin.
